ICOM's VHF/UHF Pairs for Satellite Communications

Oscar 10. Are you ready? Join the future of amateur satellite communications with ICOM's VHF and UHF transceivers. Read why ICOM is *Simplifying the Best* for satellite communications.

IC-271A/471A Twins

This new series of VHF/UHF base stations offers a combination of features and flexibility found in no other transceiver *anywhere*. For receiving MODE B downlink, the IC-471A features a less than 0.5 microvolt 10dB quieting SSB receiver plus an optional mast-mounted GaAs FET preamplifier with a 15dB gain.

Thirty-two tunable memories keep the IC-471A ready to go on frequency and to monitor the beacon frequencies. A good noise blanker plus all-mode squelch make listening a real pleasure. 10Hz variable speed tuning, which automatically shifts to 400Hz when needed, and a low-noise PLL that locks to 10Hz makes the frequency resolution of the ICOM twins

ICOM's Stackable-Portable Twins IC-290H & IC-490A

second to none. For MODE B, the IC-471A features a 10W SSB transmitter with variable power control.

The same basic features of the IC-471A apply to the IC-271A and an optional internal pre-amplifier with front panel switch is available. The IC-271A

transmitter features 25W of transmitter power.

The IC-471A and the IC-271A both have options for computer interfacing. The ICOM BUS is brought out through an optional interface to the back of the radio. From this point, it may be routed to the ICOM computer

interface terminal mounted in a matching box that will convert the ICOM BUS to RS232C standard. Allowing computer control of both transceiver units, this capability, plus the antenna tracking programs available for Oscar 10, will make the IC-271A and 471A Twins the ultimate for computer control of your satellite operations.

IC-290H/IC-490A Twins

ICOM's IC-290H and IC-490A mount together as a stackable, mountable pair that offers versatility, portability and satellite capability in an *incredibly small size*. These units are easily hung from your ham shack bench, taken on portable operations or used mobile.

Each features multiple tuning rates, memories, FM/SSB/CW, programmable scan and priority function, and an all-mode squelch. The IC-290H has a 25W transmitter, the IC-490A, 10W. Both of these transceivers are high quality designs by ICOM and offer all the flexibility needed for satellite operations.

IC-271A VHF Multimode
2 Meter / 25 Watts

IC-471A UHF Multimode
430 - 450 MHz / 10 Watts

RF AMPLIFIERS

2 METERS-ALL MODE

B23 2W in = 30W out \$89.95
(useable in: 100 mW-5W)

B108 10W in = 80W out \$179.95
(1W = 15W, 2W = 30W) RX preamp

B1016 10W in = 160W out \$279.95
(1W = 35W, 2W = 90W) RX preamp

B3016 30W in = 160W out \$239.95
(useable in: 15-45W) RX preamp
(10W = 100W)

220 MHz ALL MODE

C106 10W in = 60W out \$199.95
(1W = 15W, 2W = 30W) RX preamp

C1012 10W in = 120W out \$289.95
(2W = 45W, 5W = 90W) RX preamp

C22 2W in = 20W out \$89.95
(useable in: 200mW-5W)

**RC-1 AMPLIFIER
REMOTE CONTROL** \$24.95
Duplicates all switches, 18' cable

WATT / SWR METERS

- peak or average reading
 - direct SWR reading
- MP-1 (HF)** 1.8-30 MHz
MP-2 (VHF) 50-200 MHz
\$119.95

430-450 MHz ALL MODE

D24 2W in = 40W out \$199.95
(1W = 25W)

D1010 10W in = 100W out
(1W = 25W, 2W = 50W) \$319.95

The Circular Advantage

For OSCAR 10 and Russian Satellite Communications

2M-14C

KLM's Circular Polarized antennas have been specifically designed to optimize OSCAR 10 and Russian satellite operation. Quality workmanship and superior design, yield virtually perfect circular patterns over the satellite operational bandwidth. Enjoy less Multi-Path Distortion, less Flutter, Fade, and better S/N Ratios, with comparable performance on transmit.

Both the 2M-14C and 435-18C sport virtually unbreakable 3/16" rod parasitic elements anchored thru the boom, folded dipole driven elements produce excellent physical and electrical symmetry for years of constant performance.

Specifications: (2M-14C)

BANDWIDTH: .. 144-150 MHz	BOOM LENGTH: 12'9"
GAIN: 11 dBdc	VSWR: 1.2:1
BEAMWIDTH: 48°	WINDLOAD: 1.25 sq. ft.
FEED IMP: 50 ohm unbal.	WT. (LBS): 7.5
..... 4:1,2KW	ELLIPTICITY: ± 3 dB Max.
CIRCULARITY SWITCHER:	INCLUDED

The 435-18C is a star performer, an optional CS-2 circularity switcher puts left, and right-hand circular control in your shack, and doubles as a two port divider/impedance transformer for single feed line convenience.

435-18C

Specifications: (435-18C)

BANDWIDTH: .. 420-450 MHz	GAIN: 12 dBdc
BOOM LENGTH: 7.3 ft.	VSWR: 1.5:1
BEAMWIDTH: 44°	FEED IMP: 50 ohm unbal.
WT. (LBS): 4.5	BALUN: 2-4:1,1KW
MAST DIA: Cen-Rear/1/2"	ELLIPTICITY: 3dB MAX.
CIRCULARITY SWITCHER	(CS-2) OPTIONAL

Radio (Are You Ready?)*

24 AMSAT News

- 17 **Book Review: The UHF Compendium, Part I and Part II** By
Dom Mallozzi, N1DM

- 19 **Worldwide Satellite Activity** By Pat Gowen, G3IOR

- 18 **W6 Space Philosopher** By John Browning, W6SP

*Comets: Satellite Conference in Argentina, page 12; New
Antenna Rotator for Sightless Amateurs, page 18; Space Sym-
posium Attendees, page 34.*

Our Cover: Yoshi, JA4BLC, sports this fine looking piece of hard-
ware. It's a 20-foot diameter dish used for 432-MHz moonbounce.
For OSCAR work, JA4BLC uses a pair of seven-element Yagis for
the uplink and several seven-element Yagis for the downlink. Yoshi
is mentioned in this month's *Worldwide Satellite Activity* by G3IOR
beginning on page 19.
